

Introducing CIPP's Next-Gen Lateral Liner Solutions

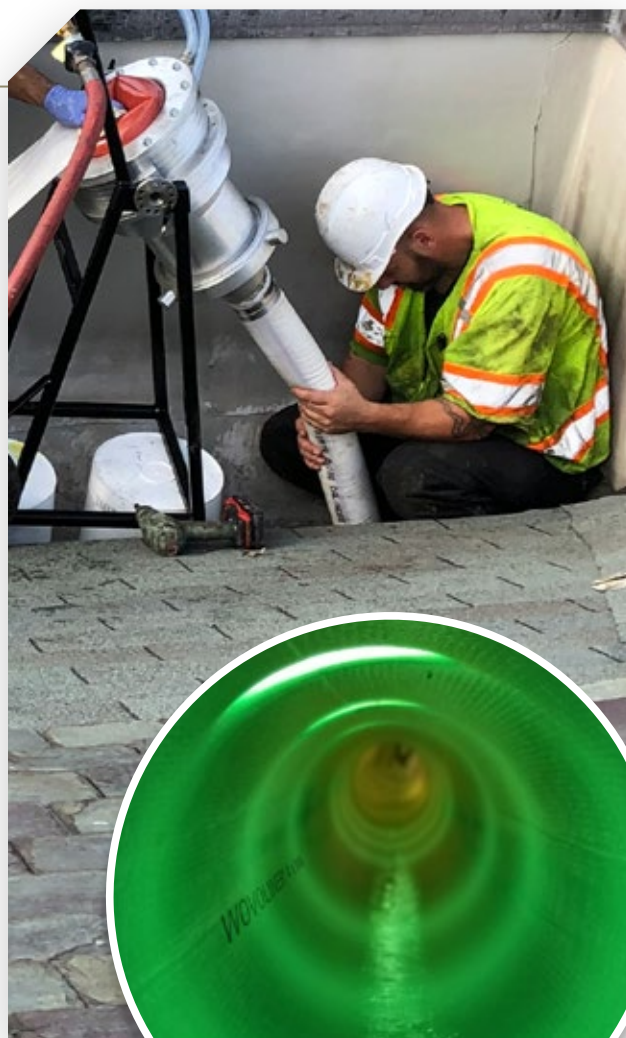

From The Global Leader You Can Trust

WovoLiner®
Premium Liners from Applied Felts®

WovoLiner® from MaxLiner (an Applied Felts® innovation) is a flexible liner uniquely bonded to a seamless impermeable PU coating that is ideal for vertical in-building and buried lateral pipelines.

- Multiple bends up to 90 degrees
- Compatible with most epoxy and LED/UV resin types
- Easily Impregnated
- Low pressure needed to invert

WovoLiner's unique construction and seamless loop stitching allows installation around virtually any turn and pipe configuration.

GAME CHANGERS!

WovoX gives more control.

Not too short, not too long. Extension of up to 50% is possible with one liner, 90-degree turns, no wrinkles, no folds, without sacrificing finished thickness.

The Wovo System helps installers looking to add in-building lining to their repertoire with a product capable of lining around multiple bends easily and with spectacular finished qualities. With the addition of WovoX to the WovoLiner System, difficult installations are transformed into reliable installations.

- Ability to transition liners to multiple diameter sizes
- Multiple bends up to 90 degrees
- Increased consistency for calculating stretch and drawback to reliably hit your landing mark!

3X Stronger, Ultraflexible and Hits The Mark

The Difference: Seamless, circular-knitted construction, combines polyester yarns with extensible fiberglass reinforcement to deliver superior physical properties when you need it most. 3x stronger than most CIPP liners with the ability to negotiate multiple bends up to 90 degrees & transition several pipe sizes including 4- to 6-inch!

- Transition several pipe diameters with one liner
- Deliver 3X the strength- greatly reducing typical ASTM-1216 design thicknesses
- Easily wets-out, inverts and transitions with very low pressure – no need for “step inflation” to exercise the liner
- Cure by ambient, heat or LED light
- Navigate 90-degree bends, no folds or wrinkles
- Use for point repairs & sectional liners (uncoated)
- Superior consistency to dramatically minimize stretch & drawback
- Ultra-flexible, extensible liner uniquely bonded to a seamless impermeable PU coating just like MaxLiner's® WovoLiner® and WovoX® products
